INTRODUCTION

Learn how to edit video in iMovie.

This document was generated on 2022-01-22 04:22:39 AM (MST).
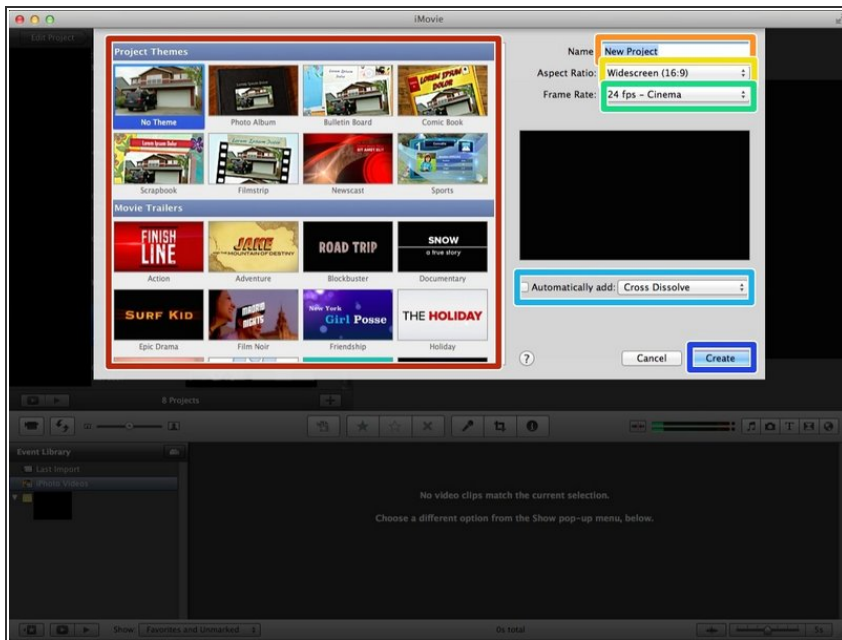

Step 1 — Opening iMovie

- Click the icon of magnifying glass.

- Click blank next to the word "Spotlight", and then type "iMovie".

- Click "iMovie" with an icon (it should appear with the word "Top hit" next to it).

Step 2 — Creating a New Project
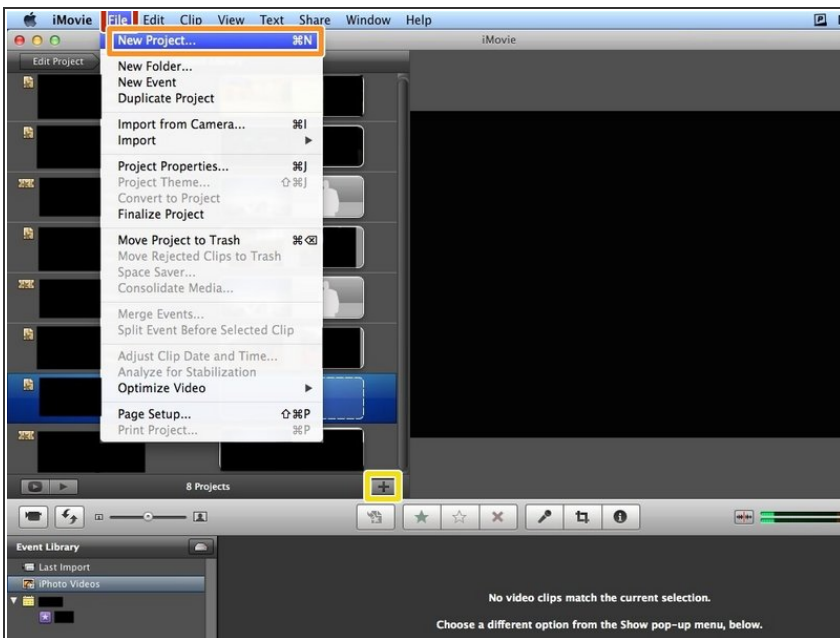

- Click "File"

- Click "New Project..." (or just press command+N(⌘+N)

- Or just click "+"
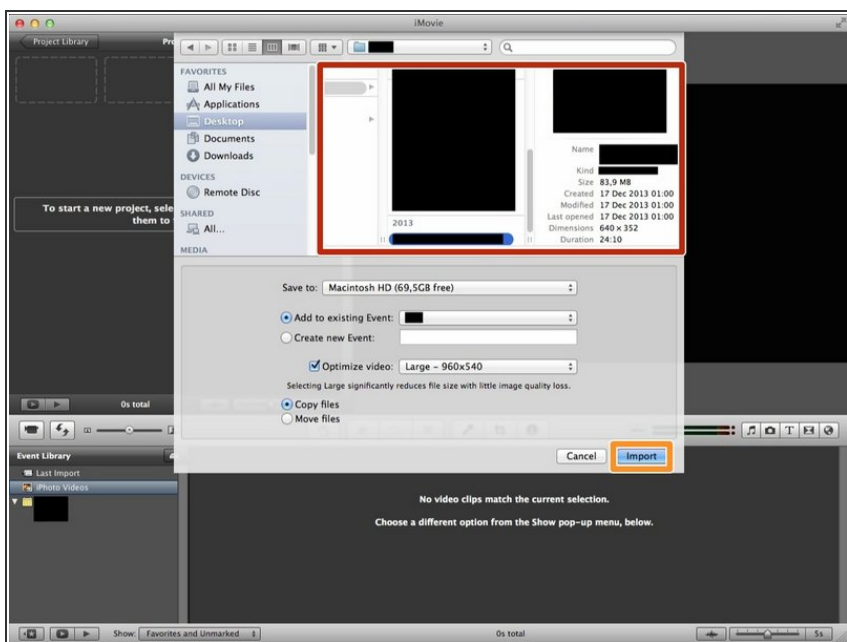

Step 3 — Changing the Settings

- You can select the theme here.
- You can change the Title of your video
- You can change the ratio of the video.
- You can change the frame rate.
- You can add effect in the video if you click the box and change the effect.
- Click "Create" if you finished editing.
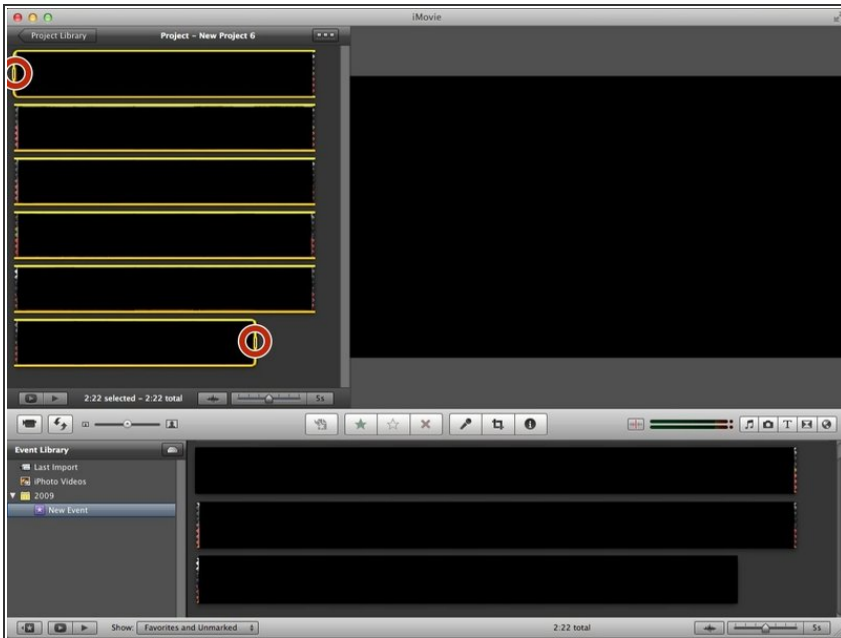

Step 4 — Importing a Movie Part 1
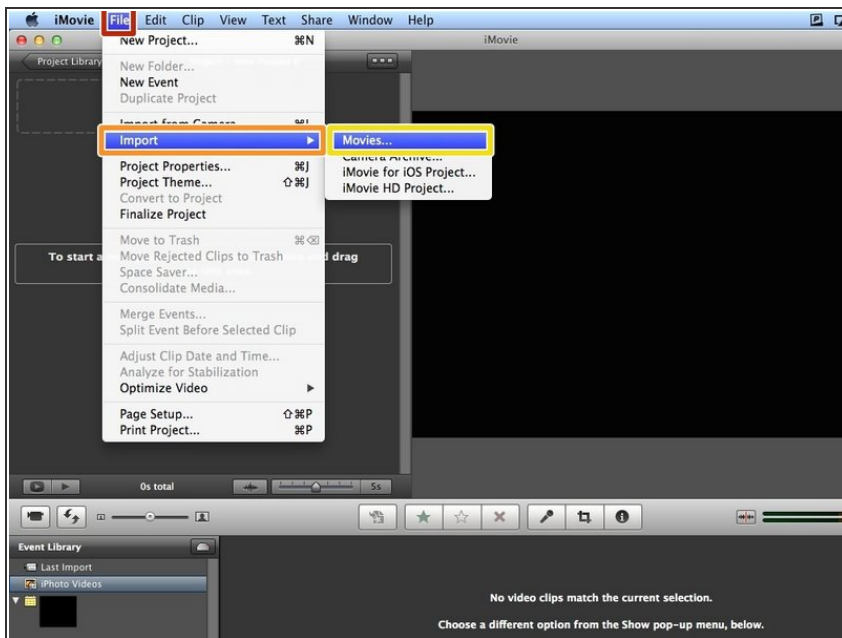

- Click "File"
- Click "Import"
- Click "Movies..."

This document was generated on 2022-01-22 04:22:39 AM (MST).

Step 5 — Importing a Movie Part 2

- Click a movie from the box.

- Click "Import" after selecting a movie.

Step 6 — Selecting a Part of the Movie

- Click the movie. Then there will be yellow label around the film. If you drag the edge of the label you can select only a part of the movie. You can delete the part if you press backspace(⌫).
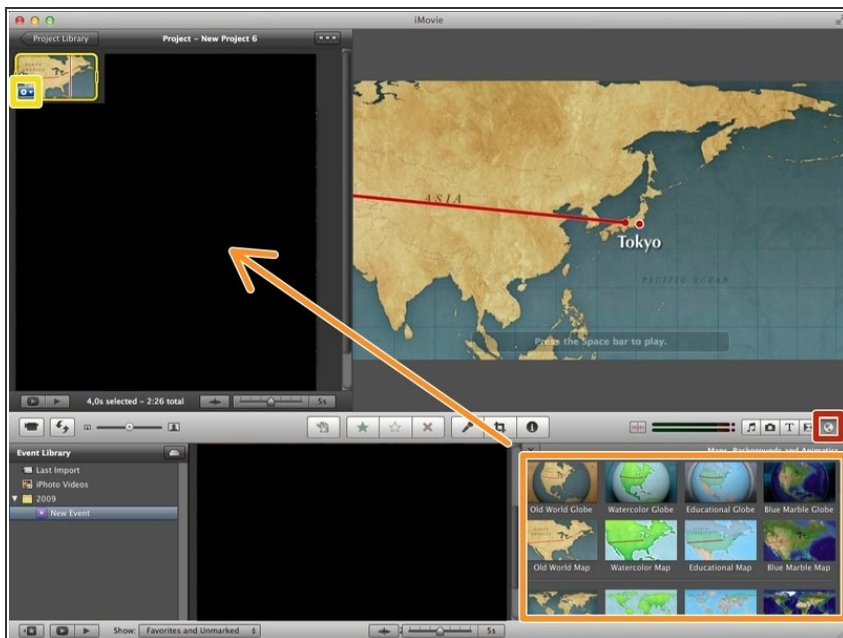

Step 7 — Adding a Text
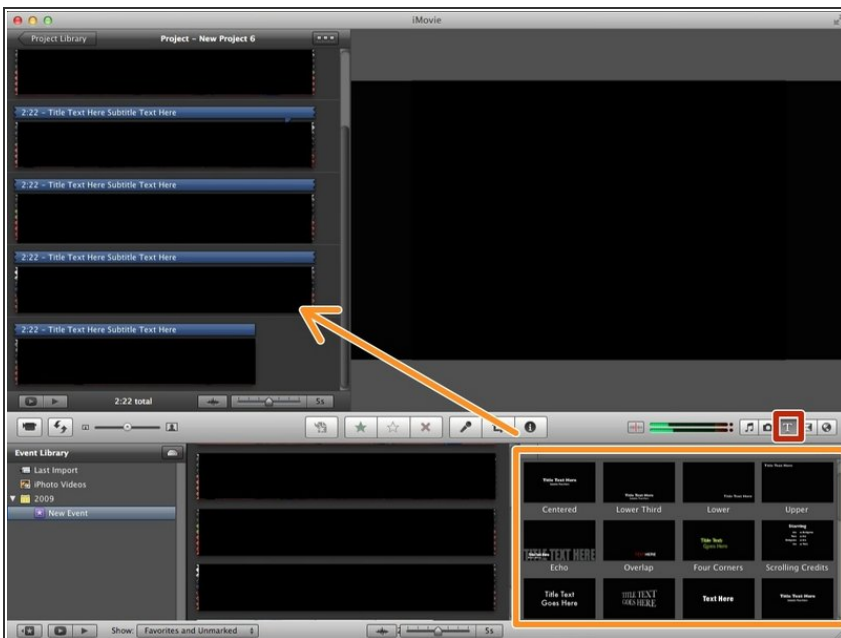

- Click "T" to add text in the movie.
- Select one from the box and drag it to the movie. Then type text.

This document was generated on 2022-01-22 04:22:39 AM (MST).

Step 8 — Adding Effects
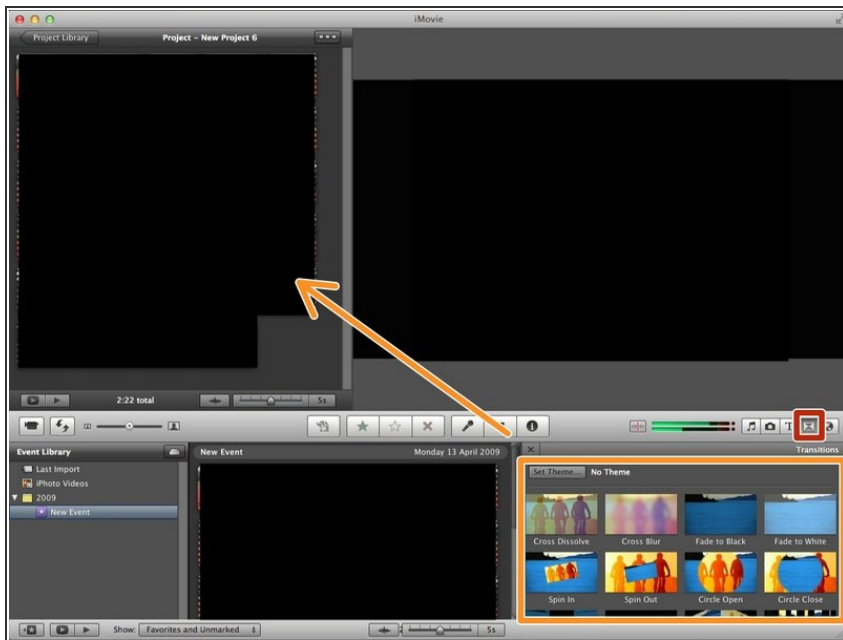

- Click this icon

- Select one from this box and drag it to the movie

- ⊡ It's very effective if you put it between two of different films.

Step 9 — Putting Maps, Backgrounds, and Animatics

- Click the icon of world.

- Click and drag the map, background, or animatic wherever you want to add to.

- Click this icon then you can change the place or effect of map.
